## **CVC Paging's Mobile Disaster Recovery Command Center**

**Mobile Command Center Ensures Continuous Paging Operations**

Our Disaster Recovery Command Center enables us to maintain paging operations should a disaster compromise our primary network operations center or NOC. This self contained facility has its own paging terminal, SNPP paging gateway for Internet and E-mail paging, power generator and all necessary equipment to duplicate our redundant satellite uplink facility. Internet and telephone service are established via a satellite connection.

Our Disaster Recovery Command Center assures us that we will be able to maintain continuous paging service to our customers, which include many hospitals, public safety organizations, utility customers and first responders.

No other paging carrier in the Northeast and possibly the country has the capability to maintain service should a disaster hit their primary network operation center.
